### COLLEGE OF COMPUTING TECHNOLOGY

# Project Report

by
Douglas Mesquita

A project report submitted in partial fulfillment for the High Diploma in Computer Science

 $\begin{tabular}{l} \label{table_equation} ICT \ Faculty \\ \end{tabular}$  Department or School Name

July 2019

## Declaration of Authorship

I, AUTHOR NAME, declare that this thesis titled, 'THESIS TITLE' and the work presented in it are my own. I confirm that:

- This work was done wholly or mainly while in candidature for a research degree at this University.
- Where any part of this thesis has previously been submitted for a degree or any other qualification at this University or any other institution, this has been clearly stated.
- Where I have consulted the published work of others, this is always clearly attributed.
- Where I have quoted from the work of others, the source is always given. With the exception of such quotations, this thesis is entirely my own work.
- I have acknowledged all main sources of help.
- Where the thesis is based on work done by myself jointly with others, I have made clear exactly what was done by others and what I have contributed myself.

### COLLEGE OF COMPUTING TECHNOLOGY

## Abstract

 $\begin{array}{c} {\rm ICT~Faculty} \\ {\rm Department~or~School~Name} \end{array}$ 

BA Hons in Computer Science

by Douglas Mesquita

The Thesis Abstract is written here (and usually kept to just this page). The page is kept centered vertically so can expand into the blank space above the title too...

# Acknowledgements

The acknowledgements and the people to thank go here, don't forget to include your project advisor...

### Introduction

The idea of the project is creating an application which manager repair services for vehicles, motorbikes, vans, and small buses. It should be available for Android devices which can be tablets or smartphones only. The customers should be able to booking any services, consult theirs last books and save theirs vehicle information for future services as well. The requirements are annual service, major service, repair or fault and major repair.

- Annual Service This pack include engine, fuel, drive system, electrical, and exhaust.
- Major Service This pack include drive system and electrical.
- Repair/ Fault This pack include bodywork repair.
- Major Repair This pack include bodywork repair, engine, and internal and vision.

### 0.1 Requires Knowledge

The project is divided into three parts. It's the client application, the administrator application and a backend service. The sever side will provide and retrieve information through the database. The client application should be responsible to bookings all the services available for the clients and also consult all the latest books on offline mode. The internal application is available only for the staff of garage. The administrator has access to view bookings for any particular day or weeks, be able to allocate a mechanic to each vehicle and also login on the system.

The client/administrator system will be developed with Kotlin language for Android using Android Studio IDE (Integrated Development Environment) and will be tested with device emulator available in Android SDK.

The backend system will be developed with Firebase. It store and sync data with our NoSQL cloud database. Data is synced across all clients in realtime, and remains available when your app goes offline.

### 0.1.1 Taking advantage of new technology

Garage app currently, It is a system that supports scalability and management the application modules. To obtain scalability of the project, Firebase Realtime store data as JSON and synchronized in realtime to every connected client, all of your clients share one Realtime Database instance and automatically receive updates with the newest data.

The Firebase database was created in response to the limitations of traditional relational database technology. When compared against relational databases, NoSQL databases are more scalable and provide superior performance, and their data model addresses several shortcomings of the relational model.

The Garage app is managing by Module concept. It is a software design technique that emphasizes separating the functionality of a program into independent, interchangeable modules, such that each contains everything necessary to execute only one aspect of the desired functionality.

With all those technologies, the system has a very straightforward ability to modularize and scale the database. Today we have similar applications that are using NoSql concept to improve the performance of database such as bank systems, delivery automation systems etc.

### 0.2 Brief summary

Phasellus nisi quam, volutpat non ullamcorper eget, congue fringilla leo. Cras et erat et nibh placerat commodo id ornare est. Nulla facilisi. Aenean pulvinar scelerisque eros eget interdum. Nunc pulvinar magna ut felis varius in hendrerit dolor accumsan. Nunc pellentesque magna quis magna bibendum non laoreet erat tincidunt. Nulla facilisi.

### Literature Review

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus at pulvinar nisi. Phasellus hendrerit, diam placerat interdum iaculis, mauris justo cursus risus, in viverra purus eros at ligula. Ut metus justo, consequat a tristique posuere, laoreet nec nibh. Etiam et scelerisque mauris. Phasellus vel massa magna. Ut non neque id tortor pharetra bibendum vitae sit amet nisi. Duis nec quam quam, sed euismod justo. Pellentesque eu tellus vitae ante tempus malesuada. Nunc accumsan, quam in congue consequat, lectus lectus dapibus erat, id aliquet urna neque at massa. Nulla facilisi. Morbi ullamcorper eleifend posuere. Donec libero leo, faucibus nec bibendum at, mattis et urna. Proin consectetur, nunc ut imperdiet lobortis, magna neque tincidunt lectus, id iaculis nisi justo id nibh. Pellentesque vel sem in erat vulputate faucibus molestie ut lorem.

### 0.3 A Section

Quisque tristique urna in lorem laoreet at laoreet quam congue. Donec dolor turpis, blandit non imperdiet aliquet, blandit et felis. In lorem nisi, pretium sit amet vestibulum sed, tempus et sem. Proin non ante turpis. Nulla imperdiet fringilla convallis. Vivamus vel bibendum nisl. Pellentesque justo lectus, molestie vel luctus sed, lobortis in libero. Nulla facilisi. Aliquam erat volutpat. Suspendisse vitae nunc nunc. Sed aliquet est suscipit sapien rhoncus non adipiscing nibh consequat. Aliquam metus urna, faucibus eu vulputate non, luctus eu justo.
